SUMMARY

CSE undergraduate with hands-on experience in designing, building, and maintaining full-stack and backend systems. Experienced in developing real-time systems, implementing secure authentication, and designing scalable APIs. Seeking software engineering and backend development opportunities to contribute to cross-functional projects and gain experience in project management and technical leadership.

SKILLS

Programming Languages	C, C++, Java, JavaScript
Backend Development	Spring Boot, Spring Security, Node.js, Express.js, REST APIs, Socket.IO
Frontend Development	React.js, HTML5, CSS3, Responsive UI, Thymeleaf
Databases	MySQL, MongoDB, Redis
Tools & Platforms	Git, GitHub, Postman, Firebase, AWS
Methodologies	Agile, Code Review, Production Systems Management

PROJECTS

Job Portal – Microservices-Based Application System

[GitHub](#)

- Developed an enterprise-grade job application platform using a Spring Boot microservices architecture, demonstrating proficiency in backend development and system design.
- Designed independent services for Authentication, Job Management, and Applications, enabling separate deployment and enhancing scalability.
- Implemented JWT-based authentication with cross-service token validation and secure role-based authorization, ensuring system security.
- Enabled seamless inter-service communication using REST APIs and token propagation, facilitating efficient data flow.
- Integrated Google Gemini API to generate AI-powered job summaries and personalized profile matching, showcasing research and application of new technologies.

CollabSpace – Real-Time Collaboration Platform

[GitHub](#)

- Built a real-time collaboration platform using Node.js, Express, MongoDB, Redis, and Socket.IO, demonstrating fullstack development capabilities.
- Implemented HTTPS/SSL support with secure WebSocket, JWT authentication, and role-based access control, ensuring secure real-time communication.
- Developed real-time features including live chat, user presence tracking, and file sharing, enhancing user collaboration.
- Integrated Redis for session management, rate limiting, and performance optimization, contributing to system efficiency and scalability.
- Implemented a freemium pricing model with Stripe-ready payment integration, demonstrating understanding of business integration.

UAB Institute Management System

[GitHub](#)

- Built a full-stack Institute Management System using React, Node.js, Express, and MySQL, showcasing end-to-end development skills.
- Implemented role-based dashboards for Students and Teachers with strict JWT-based authentication and RBAC, ensuring data security and access control.
- Developed real-time features using Socket.IO for instant notifications, assignment updates, and UI

synchronization, improving user experience.

- Enabled course enrollment, progress tracking, and profile management for students, streamlining academic processes.
- Implemented teacher workflows including course claiming, assignment creation, deletion, and student tracking, enhancing administrative efficiency.

IoT-Based Mining Worker Safety Helmet

- Designed and built an IoT-enabled safety helmet to monitor hazardous mining environments in real time, demonstrating research and hardware integration skills.
- Integrated gas sensors (MQ-2/MQ-135) to detect harmful gases such as methane and carbon monoxide, ensuring worker safety.
- Implemented temperature and humidity monitoring using DHT11 to prevent heat-related risks, contributing to a safer work environment.

ACHIEVEMENTS & CERTIFICATIONS

CGPA: 9.0	Strong academic performance in B.Tech Computer Science Engineering.
Top 10% (ICSE)	Secured 94% in Class X.
System & Networking Fundamentals	Network Fundamentals (Akamai), OS and Memory Management (Duke University).
Programming & DSA	Introductory C Programming, Pointers, Arrays, and Recursion (Duke University).
Cloud Foundations	Cloud Computing Foundations (Duke University).

EDUCATION

2023–Present	Chitkara University , Punjab — B.E. Computer Science Engineering (CGPA: 9.0)
2023	GMSSS , Chandigarh — Class XII (80%)
2021	Little Flower Convent , Panchkula — Class X (94%)
